

We are looking for a

Project Controls Engineer

USE DATA TO ANALYZE PROJECTS

As a project controls engineer you will have a key position in large-scaled complex tenders and projects. You will work in close collaboration with the project manager and will preserve an integral view on the project. The project manager will rely on you to make plans, forecasts, management reports and analyses in the areas of time scheduling, risk analysis, cost management and scope. You will create insight in the project and your advice will be invaluable for the organization to deliver the project within time and budget.

“Starting at Primaned was maybe a step outside my comfort zone, but I am very happy that I made this step.”

Sonny Vandenbruaene
Project Controls Engineer
since 2014

TOGETHER WITH THE TEAM, YOU WILL...

- be assigned to a project team to advice the project manager in the area of project controls.
- understand the technical coherence of the project and you can translate this in an integral project planning.
- be responsible for the entire process of planning & control. You will perform powerful analyses such as Earned Value, scenario and risk analysis.
- advise the project manager and the project team on possible claims.
- master project management software packages such as Primavera P6 and MS Project.

OUR OFFER

- A permanent contract with an attractive remuneration package, including a company car and group insurance.
- A challenging and varied job which will turn you into a renowned expert in the market.
- Personal development by enrolling in our intense training program.
- A unique, transparent and rewarding career path in project controls or project management consulting.

ARE YOU THE IDEAL CANDIDATE?

- You fit in our humane & entrepreneurial company DNA.
- You have a master degree in industrial, civil or business engineering.
- You have affinity with both technique and management.
- A first experience in a project-based organization is an asset but not required.
- You are fluent in English and in either Dutch or French.
- You have good knowledge of IT tools. MS Office is a must, planning software such as MS Project and Primavera P6 an asset.
- Is analytical, independent and a good communicator.
- Is flexible and eager to discover different projects and industries.
